

HALO Smart Sensor

The HALO Smart Sensor is a revolutionary device that helps you detect smoking, vaping, monitor aggression, and improve overall safety.

Proactively respond to silent alerts and easily intervene unwanted behaviour.

Can detect:

- Smoke/Vape Usage
- Aggression
- Room Occupancy
- Cries for Help
- Air Quality Issues
- Motion

Protecting the safety of individuals and organizations is crucial, particularly in areas where visual and audio recordings are restricted due to privacy concerns. Such areas face unique security challenges and may be more susceptible to prohibited or unsafe activities.

- **All-in-one, intelligent device:** detect multiple scenarios and situations from one solution
- **Real-time notifications:** quickly respond to live alerts delivered to your email or mobile
- **Integrations:** works with your existing system, saving time and costs and adds an additional layer of security
- **Easy and quick to install:** small, lightweight and discreet with an easy installation options
